

TOOL 1 – SUPERVISION & TREATMENT LEVELS

COMPREHENSIVE FRAMEWORK

(Felony & Misdemeanor Offenses)

Tool 1 incorporates the risk, need, responsivity research principles into a comprehensive framework to assist in determining the appropriate level of supervision and treatment based upon the results of a validated screening and assessment. See Addendum D for further explanation of the Central Eight Criminogenic Factors and Addendum E for further explanation of Responsivity Factors. Criminogenic treatment services refer to those programs which address the eight dynamic factors, which utilize cognitive behavioral therapy, pro-social modeling, and preferably have been evaluated pursuant to the Correctional Program Checklist. Clinical treatment refers to clinical evidence-based treatment modalities generally targetted at symptom-specific behavior (which may not address the eight criminogenic risk and need factors). Responsivity factors are identified potential barriers which, if addressed, will increase the likelihood of reducing the dynamic criminal risk factors. Responsivity factors should be used to tailor appropriate services and interventions, but should not be used punitively. Statutory definitions of “court” and “supervised” supervision services are now included in 77-18-1 (2)(b)(iv) and (2)(c) pursuant to House Bill 3004 from the Third Special Session of the 2016 Legislature, including that: “[c]ourt probation may include an administrative level of services, including notification to the court of scheduled periodic reviews of the probationer’s compliance with conditions.” “Supervised probation services provided by the department, an agency of local government, or a private organization shall specifically address the offender’s risk of reoffending as identified by a validated risk and needs screening or assessment.”

Risk Level		Need Level	Dynamic Factors								Supervision	Treatment	Responsivity Factors									
			Anti-Social Behaviors	Anti-Social Personality	Anti-Social Cognition	Anti-Social Peers	Family	School/Work	Leisure/Recreation	Substance Abuse			Functional Ability	Language	Motivation Level	Mental Health	Housing	Gender	Physical Health	Transportation	Minimization	
Low	Low										Court	None										
	Moderate										Court	Clinical										
	High										Court	Clinical										
Mod	Low										Supervised	Criminogenic										
	Moderate										Supervised	Criminogenic										
	High										Supervised	Criminogenic										
High	Low										Supervised	Criminogenic										
	Moderate										Supervised	Criminogenic										
	High										Supervised	Criminogenic
