

FORM 6 – SUPERVISION & TREATMENT LEVELS FRAMEWORK

(Felony & Misdemeanor Offenses)

Form 6 incorporates the risk, need, responsivity research principles into a comprehensive framework to assist in determining the appropriate level of supervision and treatment based upon the results of a validated screening and assessment. See Addendum D for further explanation of the Central Eight Criminogenic Factors and Addendum E for further explanation of Responsivity Factors. It should be noted that supervision services should be targeted towards moderate and high risk level offenders. It should also be noted that criminogenic treatment services are preferred for moderate and high risk level offenders. Criminogenic treatment services refer to those programs which address the eight dynamic factors, which utilize cognitive behavioral therapy, pro-social modeling, and preferably have been evaluated pursuant to the Correctional Program Checklist. Clinical treatment refers to clinical evidence-based treatment modalities generally targetted at symptom-specific behavior (which may not address the eight criminogenic risk and need factors). Responsivity factors are identified potential barriers which, if addressed, will increase the likelihood of reducing the dynamic criminal risk factors. Responsivity factors should be used to tailor appropriate services and interventions, but should not be used punitively.

		Minimization	Transportation	Physical Health	Gender	Housing	Mental Health	Motivation Level	Language	Functional Ability											
		Substance Abuse	Leisure/Recreation	School/Work	Family	Anti-Social Peers	Anti-Social Cognition	Anti-Social Personality	Anti-Social Behaviors												
		Dynamic Factors									Supervision	Treatment	Responsivity Factors								
		Low	Low									Court	None								
			Moderate									Court	Clinical								
			High									Court	Clinical								
		Mod	Low									Supervised	Criminogenic								
			Moderate									Supervised	Criminogenic								
			High									Supervised	Criminogenic								
		High	Low									Supervised	Criminogenic								
			Moderate									Supervised	Criminogenic								
			High									Supervised	Criminogenic
